ModBriteTM by **AutoBriteTM**
COMPANY

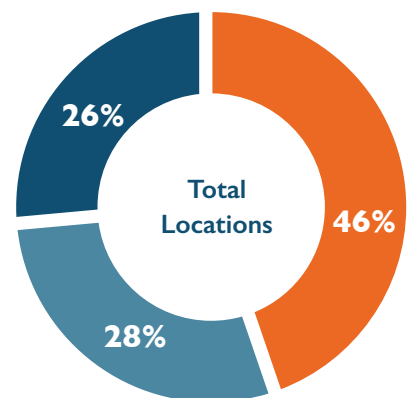

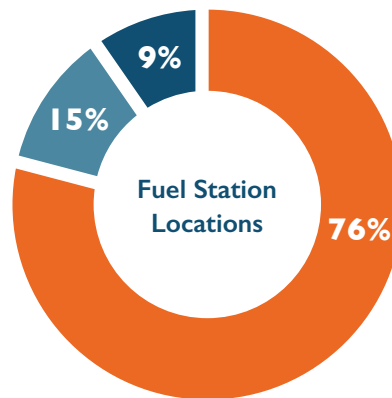

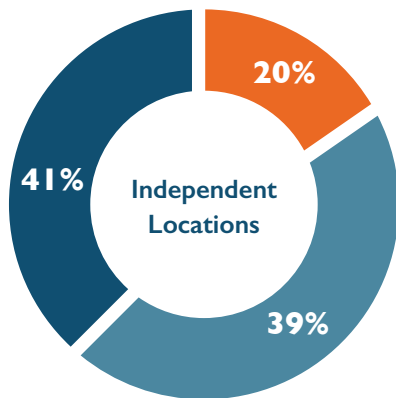

Small Footprint.

BIG ROI.

You don't need much space for our mini express tunnel. It will even fit in place of an existing car wash. The ModBrite™ is a modular dual belt conveyor express tunnel designed to fit a small footprint.

One of the three versions can even easily fit into a typical Self-Service Bay or In-Bay Automatic so that Self Service, IBA owners, convenience store owners and property owners can successfully participate in the fast-growing and profitable Express Tunnel Car Wash business. The ModBrite™ has low operating costs and can operate unmanned for 24/7 operation.

By The Numbers

Investing in automated car wash systems is the way of the future. As robotics and AI takes over all industries, the ModBrite™ by AutoBrite™ is ready to integrate with the future of car washing. Some day soon we will be telling to Siri, Alexa or Hey, Google to go wash our car. Be ready to profit from the industry trends. According to the July 2020 issue of Car Wash Magazine, the quarterly journal published by the International Car Wash Association (ICA), there are over 45,000 potential locations that are ideal for the modular express tunnel concept. Contact AutoBrite™ to get yours today!
