MAKE MORE MONEY

WITH THE MODULAR PARK CONVEYOR TUNNEL SYSTEM

Now you can get all the benefits of an express tunnel in the space of an in-bay automatic car wash. The all new Modular Park Conveyor Tunnel System dramatically increases your thru put of cars per hour, washes them faster and provides a better customer experience.

With no rollers and no chains – and therefore no scratches – the unmanned, less labor intensive, driver in park ModBrite is the safest tunnel car wash conveyor system available. Conveyor belts are made of light-weight, long-lasting, high-performance resin, specifically designed for the car wash environment.
